Calacatta Delicato

Characterized by a warm, bright white background interrupted by subtle light gray veins, this variant recalls the precious Apuan marble used by Michelangelo, from whom it sometimes takes its name.

Caratterizzato dal fondo bianco caldo e brillante, interrotto da sottili e rade venature grigio chiaro in trasparenza, ricorda il pregiato marmo apuano utilizzato da Michelangelo, da cui in alcuni casi prende il nome.

Caractérisé par un fond blanc chaud et lumineux, interrompu par de fines et éparses veines gris clair en transparence, il rappelle le précieux marbre provenant des Alpi Apuane, utilisé par Michel-Ange, duquel il tire parfois son nom.

Gekennzeichnet durch einen warmen und leuchtend weißen Hintergrund, unterbrochen durch dünne und spärliche hellgraue durchsichtige Äderungen, verweist er auf den kostbaren, von Michelangelo verwendeten apuanischen Marmor, nach dem er in einigen Fällen auch benannt wird.

Caracterizado por un fondo blanco cálido y brillante, interrumpido por finas y escasas vetas de color gris claro en transparencia, recuerda al precioso mármol apuano utilizado por Miguel Ángel, por ello en algunos casos viene llamado Michelangelo.

Характеризуется теплым белым фоном с тонкими и редкими прозрачными прожилками светло-серого цвета. Напоминает ценный сорт мрамора Апуанских Альп, который использовал Микеланджело и поэтому иногда называют его именем.

Calacatta Prestigio

As with high-end Calacatta marbles, thin, sparse warm-gray and beige veins crisscross the warm white background, while some broader veins determine its value and beauty.

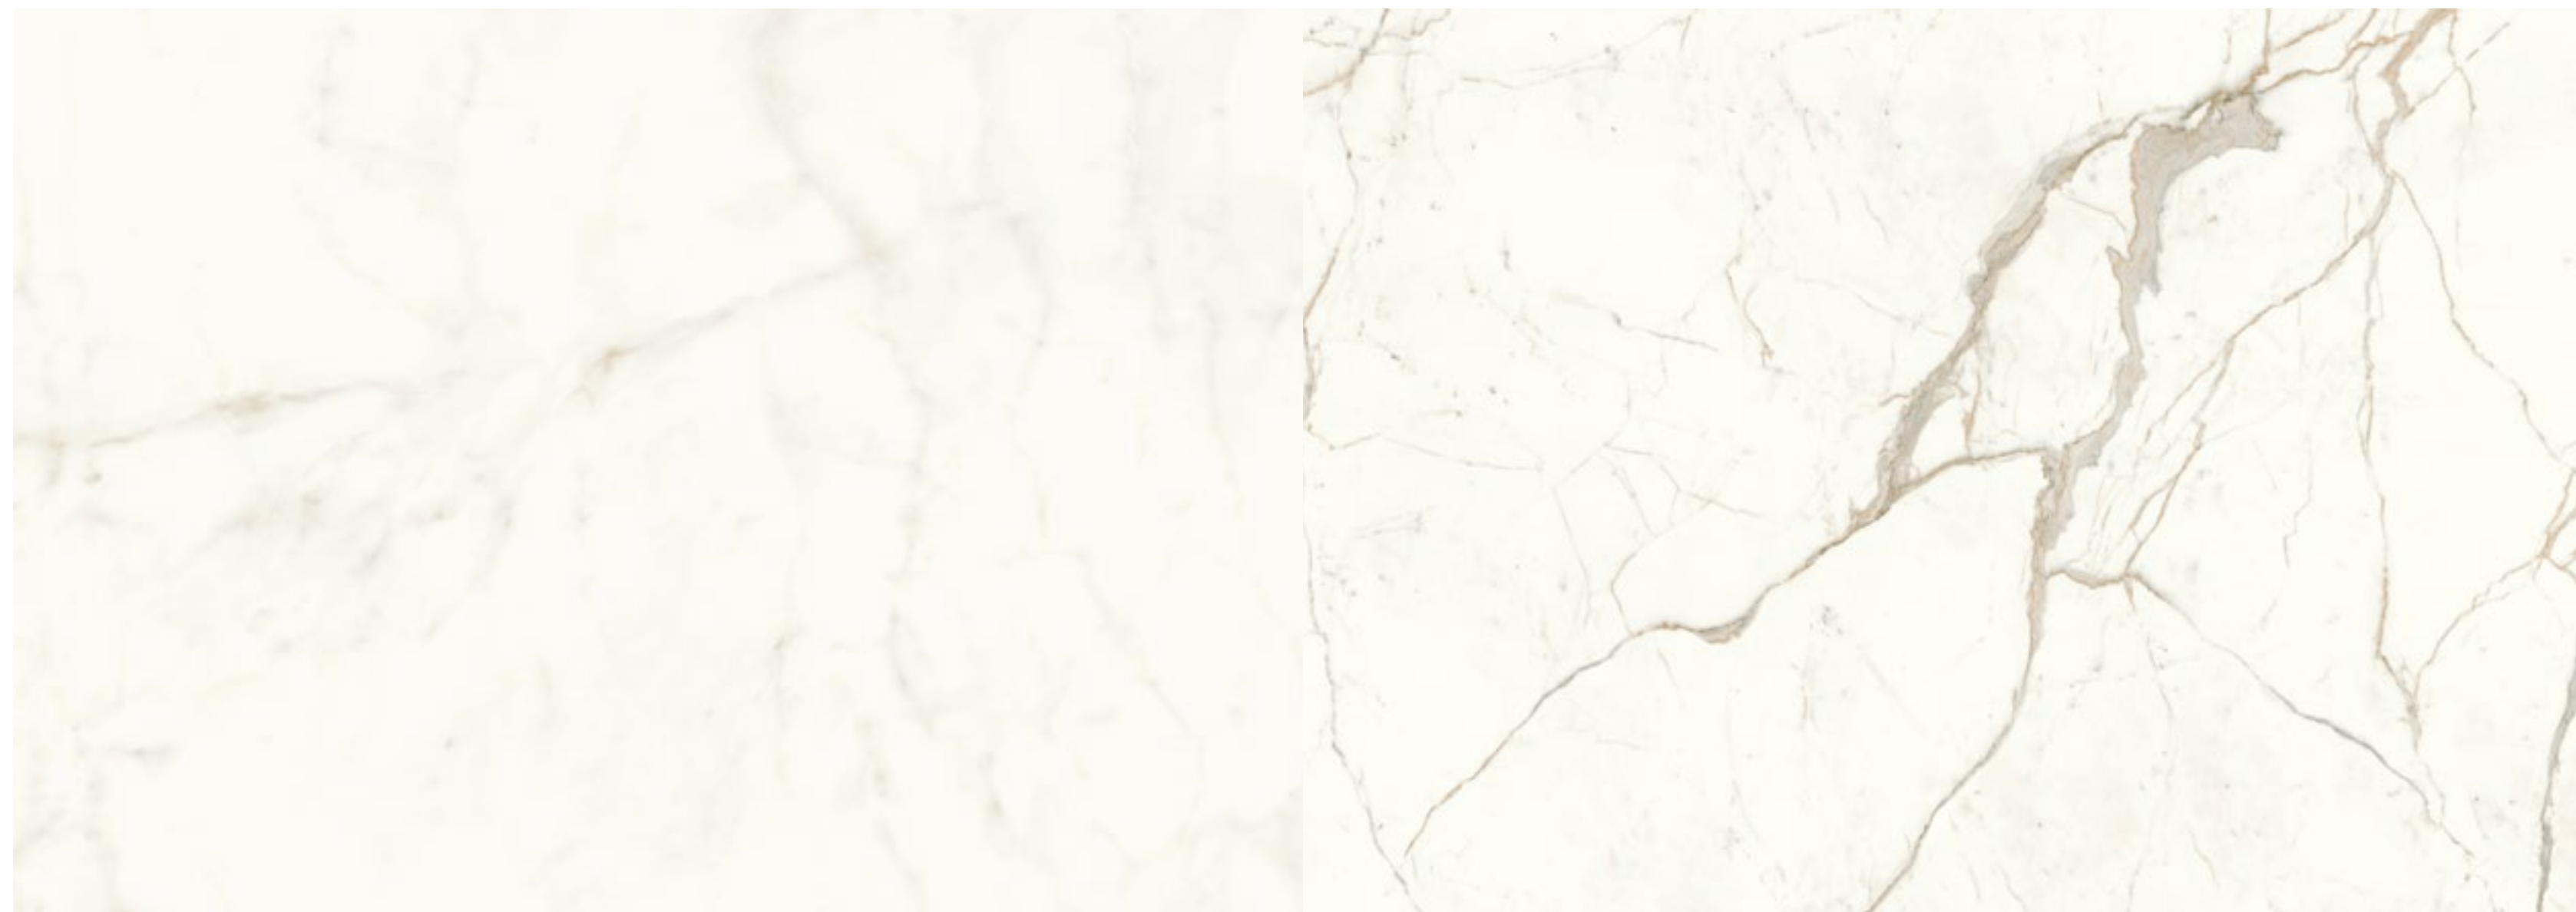

Come nei pregiati marmi Calacatta, sottili e rade venature di colore grigio caldo-beige solcano il fondo bianco caldo, mentre alcune venature più larghe ne determinano il pregio e la bellezza.

Comme dans les précieux marbres de Calacatta, des veines fines et éparses de couleur gris-beige chaud sillonnent le fond blanc chaud, tandis que quelques veines plus larges déterminent sa valeur et sa beauté.

Wie bei den kostbaren Calacatta-Marmoren, ist der warmweiße Hintergrund von dünnen und spärlichen Äderungen in warmer grau-beige Farbe geprägt, während einige breitere Äderungen seinen Wert und seine Schönheit bestimmen.

Como en los preciosos mármoles Calacatta finas y escasas vetas gris cálido y beige surcan el fondo blanco cálido, mientras que algunas vetas más anchas determinan su valor y belleza.

Как и в случае ценных сортов мрамора Calacatta, тонкие и редкие прожилки серого и бежевого цвета мягко выступают на теплом белом фоне, а более широкие придают ему особую красоту.

- A polished finish is recommended for low-stress residential or commercial floors where anti-slip performance is not required. The surface's shine and superior ease of cleaning are the result of in-depth studies and extensive technical research aimed at ensuring its durability over time. If the product is in direct contact with the outside, use moisture and dirt absorption devices to prevent scratches. Small irregularities on the surface are an intrinsic feature of the product, intended to imitate the surfaces of natural stone.** La finitura lappata è indicata per pavimenti residenziali o commerciali poco sollecitati, laddove non siano richieste prestazioni antiscivolo. La lucentezza e l'elevata facilità di pulizia della superficie sono frutto di studi approfonditi e accurate ricerche tecniche volte a garantire la persistenza nel tempo. Se il prodotto è a diretto contatto con l'esterno, prevedere dei dispositivi di assorbimento dell'umidità e dello sporco per prevenire la formazione di graffi. Piccole irregolarità superficiali sono una caratteristica intrinseca del prodotto, volte ad imitare le superfici delle pietre naturali. - La finition semi-polie est indiquée pour les sols résidentiels ou commerciaux à faibles contraintes, où la caractéristique antidérapante n'est pas nécessaire. La brillance et la grande facilité de nettoyage de la surface sont le résultat d'études approfondies et de recherches techniques précises visant à assurer sa pérennité dans le temps. Si le produit est en contact direct avec l'extérieur, prévoir des dispositifs d'absorption de l'humidité et des poussières pour prévenir la formation de rayures. Les petites irrégularités superficielles sont une caractéristique intrinsèque du produit et visent à imiter la surface de la pierre naturelle. - Die Oberflächenversion Geläpft eignet sich für Bodenbeläge in Wohnbereichen bzw. in gering beanspruchten Gewerberäumen, wenn keine Rutschfestigkeit erforderlich ist. Der Glanz und die einfache Reinigung der Oberfläche sind das Resultat eingehender technischer Studien, mit denen die langfristige Beständigkeit sichergestellt wurde. Kommt das Produkt direkt mit der externen Umgebung in Kontakt, so sind Feuchtigkeit und Schmutz mit geeigneten Mitteln aufzunehmen, um Kratzer zu vermeiden. Kleine Unregelmäßigkeiten der Oberflächen sind typisch für das Produkt, das die Oberflächen von Natursteinen nachempfunden. - El acabado laseado es adecuado para pavimentos residenciales o comerciales con poco tráfico, donde no se requiere un efecto antideslizante. El brillo y la gran facilidad de limpieza de la superficie son el resultado de profundos estudios e investigaciones técnicas precisas para asegurar su persistencia en el tiempo. Si el producto está en contacto directo con el exterior, proporcionar dispositivos de absorción de humedad y suciedad para evitar arañazos. Pequeñas irregularidades superficiales son una característica intrínseca del producto, diseñadas para imitar las superficies de las piedras naturales. - Лаппатированная поверхность рекомендована для полов жилых и коммерческих помещений с невысокой интенсивностью эксплуатации, в которых от покрытия не требуется характеристик сопротивления сколжению. Блеск и легкая очищаемость являются результатом глубоких исследований, направленных на создание долговечного материала. Если плитка находится в непосредственном контакте с наружной средой, необходимо предусмотреть устройства поглощения влаги и грязи во избежание образования царапин. Небольшие неровности поверхности являются характеристикой данного изделия и призваны имитировать поверхность природного камня.
